# Counterbalance Industrial Forklift Certification

The counterbalance forklift certification course provides the skills needed to operate industrial counterbalance forklifts. A written test and practical evaluation are included in the training. Operator skills will be monitored and evaluated using industry standards. The training is not make or model specific but covers concepts common to most major brands of the equipment covered.

Renewal of operator certification is required every three years in the US for forklifts.

Upon completion of this training program, you will be knowledgeable and demonstrate proficiency in:

- counterbalance forklift basics;
- rules and regulations;
- types, main parts and their functions;
- safety systems;
- pre-use inspection;
- safe operating procedures;
- limitations, hazards and controls.

Upon successful completion, will provide an operator's certificate in the form of a wallet card.
